The 3rd International Congress  
"DIABETES MELLITUS AND SURGICAL INFECTIONS"

**14–16**  
of November  
2017,  
Moscow

**Dear colleagues!**

14-16 November 2017 RPO "Surgical society – Wounds and wound infections", A.V. Vishnevsky Institute of Surgery of Ministry of Health of Russia, Endocrinology research center, Research Institute of Urgent Pediatric Surgery and Traumatology, LLC "Russian Society of Surgeons", International Foundation for Children in Catastrophes and Russian Peoples Friendship University, Ministry of Education and Science of Russia are planning the **3rd International Congress "Diabetes mellitus and surgical infection"**.

Diabetes mellitus is one of the leading disease in the structure of morbidity patterns in economically developed countries. Its prevalence is 1.5-6% of the population. It is suggested that the number of such patients by 2030 will reach 552 million people. Patients with carbohydrate metabolism disorder are a significant part of the contingent that seeking medical advice from various specialists, including surgeons. In this regard, topical issues are surgical treatment, anesthetic support and perioperative management of patients with a surgical infection that occurs against the background of diabetes mellitus. The success of the past events: the 1st International Congress "Diabetes Mellitus and Surgical Infections", which was held on the 14-17th of October, 2013 at the A.V. Vishnevsky Institute of Surgery, and the 2nd International Congress "Diabetes Mellitus and Surgical Infections", which was held on the 25-27th of November, 2015 at the Endocrinology Research Center, testifies the interest to this subject of discussion.

The effectiveness of the further development of the specialized medical care system for patients with surgical infection that occurs against the background of diabetes mellitus depends entirely on the formation of a single multidisciplinary approach and continuity between the practical specialists in all regions of the Russian Federation. In this regard, all interested health workers are invited to participate in the **3rd International Congress "Diabetes Mellitus and Surgical Infections"**. The Organizing Committee draws the attention of the Health organizers (the Chief Physicians of Medical and Leisure Institutions, Surgeons-in-chief from Russian entities, Departments and Ministries of Health) to the forthcoming Congress and recommends them to send their specialists for participation.

**The main themes of the Congress:**

1. Diabetes mellitus and surgical infections is the interdisciplinary problem of modern medicine:
  - Epidemiology of diabetes mellitus and its late vascular sequels;
  - Morphological and immunological features of the wound process for patients with diabetes mellitus;
  - Economic aspects of diabetes mellitus treatment and its late vascular sequels.
2. Optimization of therapeutic management protocols of patients with diabetes mellitus and surgical infections.
3. Diabetic foot syndrome.
4. Peripheral artery disease as a presentation of diabetic macroangiopathy.
5. Treatment problems of patients with diabetes mellitus and surgical infections in thoracic, abdominal, cardiovascular surgery, traumatology and orthopedy, transplantology, oncology, etc.
