International scientific and practical conference "VACUUM THERAPY OF CHILDREN AND ADULTS' WOUNDS. RUSSIAN AND INTERNATIONAL EXPERIENCE"

18–19 Dear colleagues!

may
2018,
Moscow

18–19 may 2018 RPO "Surgical Society – Wounds and Wound Infections", State Budgetary Healthcare Institution "Research Institute of Emergency pediatric surgery and traumatology" Moscow Health Department, Federal Government Budgetary Institution "A.V. Vishnevsky Institute of Surgery" Ministry of Health of Russian Federation, FSAEI "Peoples' Friendship University of Russia" Ministry of Education and Science of Russian Federation, LLC "Russian Surgery Society", International Fund of Assistance to Children suffered in Catastrophes and Wars plan to hold **International scientific and practical conference "Vacuum therapy of children and adults' wounds. Russian and international experience"**.

Developing of new medicine for local wounds treatment as searching alternative methods mostly based on physical phenomena and powers are the directions, which occupy minds of scientists and doctors from all over the world for a long time. Vacuum therapy is one of such methods and due to its efficiency, safety and convenience for both the doctor and the patient got the great love among surgeons of different specialties. The success of conference "VACUUM THERAPY OF CHILDREN AND ADULTS' WOUNDS", that was held by RPO "Surgical Society – Wounds and Wound Infections" on the 16–17th of April 2013 in Moscow (the event archive is on the website www.woundsurgery.ru) has led to almost widespread implementation of the method in surgical practice of healthcare organizations in Russian Federation and CIS nations. The rapid increase of number of reports on surgical forums and articles in printed media, oriented on the experience of using negative pressure in surgery, also make obvious the high interest of professional society to this problem. Moreover, recent experience requires the analysis of far results and developing of treatment guidelines for both children and adults' clinical practice. Special attention should be paid to such questions as structure of vacuum therapy, number of bandaging and duration of treatment.

It is expected the participation in conference of head specialists on problems of wounds and wound infections from Europe, the USA and Latin America.

The Organizing Committee calls attention of public health administrators (chief physicians of the healthcare institutions, chief surgeons of territorial entity of Russian Federation, Departments and Ministries of Health) on forthcoming conference and recommends sending specialists for participation.

The main themes:

1. Pathogenesis of wounding process in vacuum therapy.
2. Physiologic and morphologic characteristics of using the vacuum therapy.
3. Methods of children and adults' vacuum therapy: regiments, numbers of changing the bandages, the duration of treatment.
4. Technical support of wounds in vacuum therapy and economic aspects of using the vacuum bandages.
5. The vacuum therapy of wounds and particular results of its using:
 - Pediatric surgery;
 - Traumatology and orthopedics;
 - Purulent surgery;
 - Thoracic surgery;
 - Abdominal surgery;
 - Vascular surgery;
 - Combustiology;
 - Plastic surgery.

Abstracts sent before the 1st of March will be published in the conference information package after approval by the Organizing Committee.

Abstracts up to 4 pages in electronic form (MS WORD, Times New Roman font, text size 12, interval 1,5) must be sent on the e-mail: ezotova2008@mail.ru. In the end of the text there should be listed surname, name, paternal name, address with the postcode, telephone number and e-mail.

Attention! Contest! As part of the conference it will be held the contest of projects for young scientists (under 35 years old). 3 best projects will be awarded. The projects sent with the mark "for the contest" will participate. The conditions of the contest: the project mustn't be published before, there must be just one author in each project, the theme of the project must be appropriate to the scientific program of conference.

Location: Moscow, Bolshaya Polyanka st., 22 (State Budgetary Healthcare Institution "Research Institute of Emergency pediatric surgery and traumatology" Moscow Health Department).
