

P R E S S - R E L E A S E

the 5<sup>th</sup> International Conference "DIABETES MELLITUS, ITS COMPLICATIONS AND SURGICAL INFECTIONS"

21–23  
November  
2022,  
Moscow

Dear colleagues!

The 5th International Scientific and Practical Congress "Diabetes mellitus, its complications and surgical infections" will be held on November 21–23, 2022, in Moscow at A.V. Vishnevsky National Medical Research Center of Surgery in Moscow.

Diabetes mellitus occupies one of the first places in the structure of morbidity among residents of economically developed countries. Its prevalence ranges from 5.0 to 12.0% of the population. By the forecast of the International Diabetes Federation (IDF), the number of such patients by 2040 will exceed 600 million people. Patients with disorders of carbohydrate metabolism make up a significant part of those who seek help from doctors of various specialties (endocrinologists, surgeons, therapists, ophthalmologists, cardiologists, neurologists, etc.). In this regard, it is topical to have the discussion on the interdisciplinary approach for treating diabetes mellitus and for providing the continuity of medical work at different levels in different medical institutions so as to assure the long-term follow-up of this category of patients.

Taking into account the urgency of the problem, Russian Association of Endocrinologists, Regional Public Organization "Surgical Society - Wounds and Wound Infections", National Medical Research Center of Endocrinology subordinate to the Ministry of Health of Russia, A.V. Vishnevsky National Medical Research Center of Surgery subordinate to the Ministry of Health of Russia have agreed to jointly hold this scientific forum (the archive of the previous events is on the website [www.woundsurgery.ru](http://www.woundsurgery.ru)). It is extremely important to bring together physicians of various specialties so as to exchange and to share their experience.

The effectiveness of further development of the system of specialized medical care for patients with diabetes mellitus and its late micro- and macrovascular complications, with comorbid diseases, especially surgical infections, depends entirely on the formation of a unified interdisciplinary approach and continuity between practical specialists from all regions of the Russian Federation. In this regard, the Organizing Committee invites all interested medical specialists to take part in the 5th International Congress "Diabetes mellitus, its complications and surgical infections".

The Organizing Committee draws attention of healthcare organizers (chief physicians of medical institutions, regional chief surgeons, heads of departments and ministries of health) to the upcoming congress and recommends them to send their specialists to participate in it.

**The congress will be held at A.V. Vishnevsky National Medical Research Center of Surgery with online transmission by address: Moscow, Bolshaya Serpukhovskaya str. 27, from November 21 till November 23, 2022.**

**Congress program:**

1. Diabetes mellitus and its complications
  - Epidemiology of diabetes mellitus and its complications. Federal Diabetes Registry.
