International Conference "LOCAL TREATMENT AND BIOPHYSICAL TECHNOLOGIES IN THE THERAPY OF WOUNDS AND
PURULENT-NECROTIC FOCIES IN CHILDREN AND ADULTS"

21–22

May
2024,
Moscow

Dear colleagues!

On May 21–22, 2024, an international scientific and practical conference "Local treatment and biophysical technologies in the treatment of wounds and purulent-necrotic lesions in children and adults" is planned to be held in Moscow.

Natural and man-made disasters, the annual increase in the number of patients with severe skeletal trauma, the increase in cardiovascular, systemic diseases and diabetes mellitus lead to a steady increase in the number of patients with chronic wounds and non-healing defects of soft tissues and bones due to the complicated course of a traumatic disease or the presence of concomitant diseases. The general increase in life expectancy and the comorbidity of patients make the topic under discussion very relevant! The problem deserves the attention of doctors of various specialties: purulent and reconstructive surgeons, orthopedic traumatologists, anesthesiologists-resuscitators, rheumatologists, oncologists, rehabilitation specialists, specialists with secondary medical education - and we count not only on holding an interdisciplinary conference with a broad discussion, but also on developing joint clinical recommendations.

The Organizing Committee draws the attention of health care organizers (chief doctors of medical institutions, chief surgeons of the constituent entities of the Russian Federation, departments and ministries of health) to the upcoming forum and recommends sending their specialists to participate in it.

The conference will be held on May 21 – 22 at the address: 27 Bolshaya Serpukhovskaya Str., Moscow (Federal State Budgetary Institution "A.V. Vishnevsky National Medical Research Center of Surgery" of the Ministry of Health of Russia) in person with online broadcast (or online when restrictions are introduced).

Conference Program:

1. New domestic developments of various drugs for wounds local treatment (antiseptic solutions, wound dressings, sorbents, oils, aerosols, ointments, etc.)
2. Local medicinal treatment of wounds with drugs with an antimicrobial component as an alternative to long-term systemic antibacterial therapy.
3. Outpatient stage of local medicinal treatment of wounds, bedsores, trophic ulcers, diabetic foot syndrome, patients with chronic osteomyelitis of various localizations, acute purulent diseases of the skin and soft tissues.
4. Old "traditional" or new drugs for the prevention and treatment of wound infections (it is possible to organize symposiums of pharmaceutical companies).
5. Multicomponent sorbents or ointments on a polyethylene glycol basis in the complex treatment of foci of skin and soft tissues infection.
6. Road transport, military trauma, natural and man-made disasters, sports and household trauma with damage to the skin. Rational choice of dressing, both at the stage of first aid and evacuation, and at the hospital stage of treatment.
7. Preparations for local treatment of wounds with anaerobic clostridial and non-clostridial infection.
8. Mycoses - current state of local drug treatment, problems and prospects, differential diagnosis.
9. Hidradenitis suppurativa as a multidisciplinary problem.
10. Systemic and local use of bacteriophages for the treatment of wounds and purulent-necrotic lesions.
11. Features of local drug therapy for chronic wounds (modern dressings, bacteriophages, larvae).
12. Modern biophysical methods for treating chronic wounds (NPWT, ultrasonic cavitation, argon plasma technologies, hydrosurgery, etc.).
13. Rehabilitation and patronage of patients with chronic wounds of various etiologies and locations.
14. Features of anesthesia and intensive care for chronic wounds in children and adults.
15. The role of nursing care in organizing and providing care for chronic wounds in children and adults
16. Organizational aspects of outpatient care for patients with wounds and wound infections in the context of currently ongoing reforms (experience of ambulatory surgery centers, one-day hospitals, dressing clinics with small operating rooms, etc.).

The abstracts submitted before 25 of March 2024, and approved by the Organizing Committee will be published in the conference Proceedings.

Abstracts up to four pages in electronic form (MS WORD, font Times New Roman, size-12, spacing 1.0) should be sent by e-mail: 9057176757@mail.ru. The text should

P R E S S - R E L E A S E

be preceded by author/authors full name, place of work with postal code, contact phone number, e-mail address.

Abstract title – in capital letters.

Full name of author and co-authors - in lower case letters.

Author and co-author affiliation - in lower case letters.

Note: If the co-authors work at different institutions, they are identified by an asterisk symbol with the caption of their affiliations.

Structured abstract specifications: Relevance, Objective, Material and Methods, Results, Discussion, Conclusions.

Note: If the abstract is "Clinical case", their no need to keep to the structured abstract specifications.

Attention! Participation in all scientific events and a certificate of participation with NMO scores are free of charge for all registrants! Payment is made only for the package of conference participant (if one needs it).

Participant Package Price:

Members of the RPO "Surgical Society -

Wounds and wound infections", speakers *

- 0 ₺

Clinical residents, graduate students, nurses

- 500 ₺

Physicians, lecturer, professors

- 1000 ₺

Membership package includes:

- participant's portfolio (conference program, proceedings, information material)
- issue of the journal "Wounds and wound infections. The Prof. B. M. Kostyuchenok Journal".

Payment for the participant's package will be made at registration.

*How to join the Society - information at website www.woundsurgery.ru.

Venue: 27 B. Serpukhovskaya Str., Moscow, Russia A.V. Vishnevsky National Medical Research Center of Surgery

Address of the Organizing Committee:

117997 Moscow, B. Serpukhovskaya str. 27,

Vishnevsky National Medical Research Center of Surgery
